

# Neurology Conditions We Treat

Our team is dedicated to evaluating and treating infants, children, adolescents and young adults with disorders of the nervous system.

The process of diagnosing and treating a child with a neurological condition can be stressful for parents and caregivers. We strive to create a compassionate and welcoming environment and believe parents and caregivers are essential and active participants in their child's entire treatment process.

## Pediatric Neurology

Our board-certified pediatric neurologists specialize in the diagnosis and treatment of disorders of the nervous system in infants through young adults up to 21 years, including:

- » Attention-deficit/hyperactivity disorder (ADHD)
- » Autism spectrum disorder
- » Brain injury and concussions
- » Cerebral palsy (CP)
- » Encephalitis
- » Epilepsy and seizures
- » Headaches and migraines
- » Learning and developmental disorders
- » Metabolic disorders
- » Multiple sclerosis (MS) and neuromyelitis optica (NMO)
- » Neuromuscular disorders (e.g., spinal muscular atrophy, congenital myopathy, muscular dystrophy and myasthenia gravis)
- » Peripheral neuropathy
- » Rett syndrome
- » Tics and Tourette syndrome
- » Tuberous sclerosis
